## ***FAST FACTS***

The Texas Virtual School Network (TxVSN) was established by the 80th Texas Legislature in Senate Bill 1788 and codified in TEC Chapter 30A to establish and administer a state virtual school network to provide education to students through electronic means.

The overarching goal of this Texas Education Agency (TEA) initiative is to provide Texas high school students with high quality online courses, aligned with the Texas Essential Knowledge and Skills.

Online course offerings began in January 2009 for high school students in Texas public school districts and open enrollment charter schools.

To capture data mandated by the legislation, TxVSN is assessing high school students' online course needs and future online course interests. Encourage your students to create a TxVSN student account and to provide TxVSN their input on future course offerings!
